## PROFILE

I am a Full Stack Web Developer who enjoys building websites and applications that people use and enjoy.

## SKILLS

HTML, CSS, SASS, JavaScript, Node JS, Express, React, NextJS, MongoDB, PHP, Github, SEO

## EXPERIENCE

---

### Web Developer | Vancouver Canucks

June 2022 -Present, Vancouver, BC

- Rebuilt RogersArena.com, enabling the CSE content team to update content as needed. Improved site load times, SEO, and performance.
- Co-developed the modern Canucks ticketing site in NextJS, modernizing the codebase to improve performance, sales tracking abilities
- Designed bespoke landing pages for marketing campaigns and sales efforts in partnership with the Canucks' sales and ticketing teams
- Established an eCommerce tracking system to enable reporting of campaign performance through conversions, sales, and other metrics

### Full Stack Developer | Fobi AI Inc

October 2020 - August 2021, Vancouver, BC

- Designed and developed the Grenadier Prototype Tour website along with a functional mobile Wallet pass that served as the customer's digital ticket
- Oversaw a team of five developers during the project, successfully delivering all products on time and budget
- Contributed to projects in an AGILE environment, focusing on the front end of FOBI's technology stack, including tickets in HTML, CSS, Javascript, and Typescript

## EDUCATION
